Project Overview

The School Board of Polk County (Polk County) is revitalizing schools in communities with high poverty and unemployment by significantly revising two existing magnet schools and converting three traditional schools to whole-school magnet programs. Polk County is developing rigorous units of study; implementing innovative STEM and technology-based projects; and providing personalized learning experiences for all students. These Magnet Schools Assistance Program (MSAP)-funded schools address the unique needs of their students and communities by implementing research-based approaches that promote sustainable reform. Working with a variety of partners, the MSAP schools are preparing students with the 21st century skills needed to succeed in Florida's growing STEM workforce. The MSAP schools are attracting students from diverse racial/ethnic and socioeconomic backgrounds – a strategy designed to boost self-esteem, achievement, and positive cross-cultural relations.
